

**4 NOVEMBER 2021  
VIRTUAL EVENT**

**On 4 November 2021, INHSU - in partnership with SAMMSU and Infodrog - will be hosting 'The Swiss Hub', a satellite meeting of INHSU's international conference.**

The Swiss Hub Meeting is available virtually, via a state of the art platform. It will be held from 12:40pm – 4:40pm.

Created specifically for attendees based in Switzerland, the virtual event is free to attend and will highlight key presentations from INHSU 2021 and profile local research and best practice in health and hepatitis management for people who use drugs.

The meeting seeks to provide INHSU members, partners, practitioners, researchers, industry representatives, and community members located in Switzerland with a dedicated event highlighting key presentations from INHSU 2021 and to present local models of care.

- Session 1: Key presentations from INHSU 2021, taking place in-person in Sydney and virtually in October
- Session 2: Presentations on epidemiology, public health & treatment in Switzerland
- Session 3: Discover innovative models of care from across Switzerland
- Session 4: We'll close the day with a panel discussion of Swiss experts

The Hub Meeting will be structured as a half-day meeting, with plenty of opportunities for participants to engage virtually with speakers and other delegates.

*A request for CPD accreditation through the Swiss Society of Internal and General Medicine (SSMIG) and the Swiss Society of Gastroenterology (SSG) is in progress.*

## EVENT DETAILS
